IBM Watson IoT Platform Journey

☒ **Lite**

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

- Free

☐ **Non-Production**

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

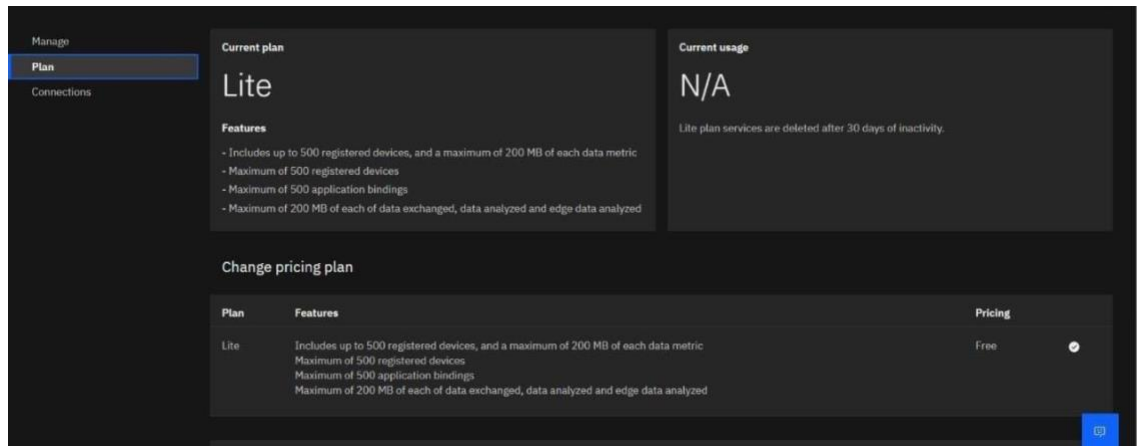

- Starts at \$500 per month

☐ **Production**

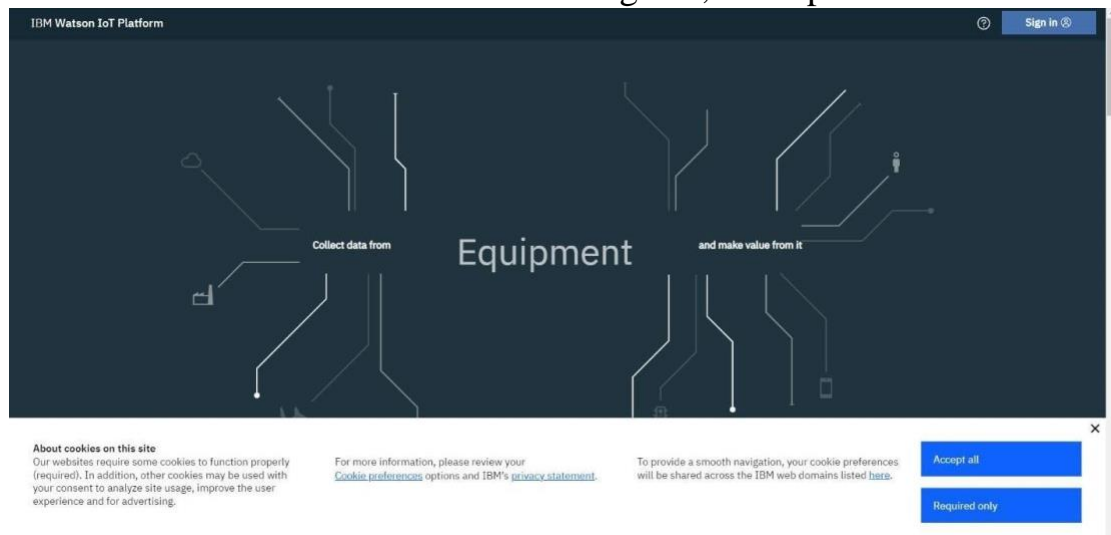

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

- Includes IBM Service & Support

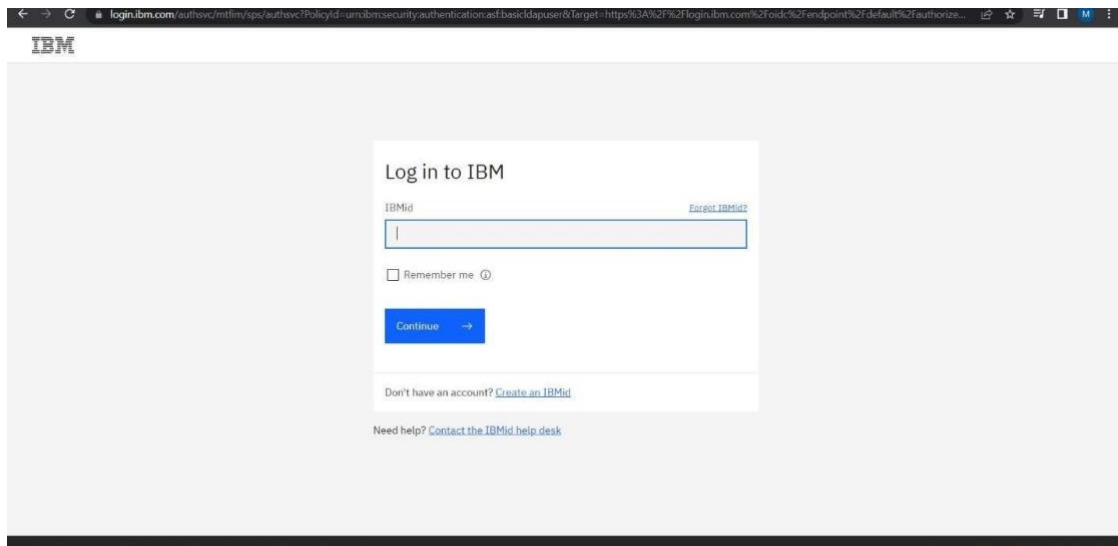

9. manage is for launch, plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IOT with other services

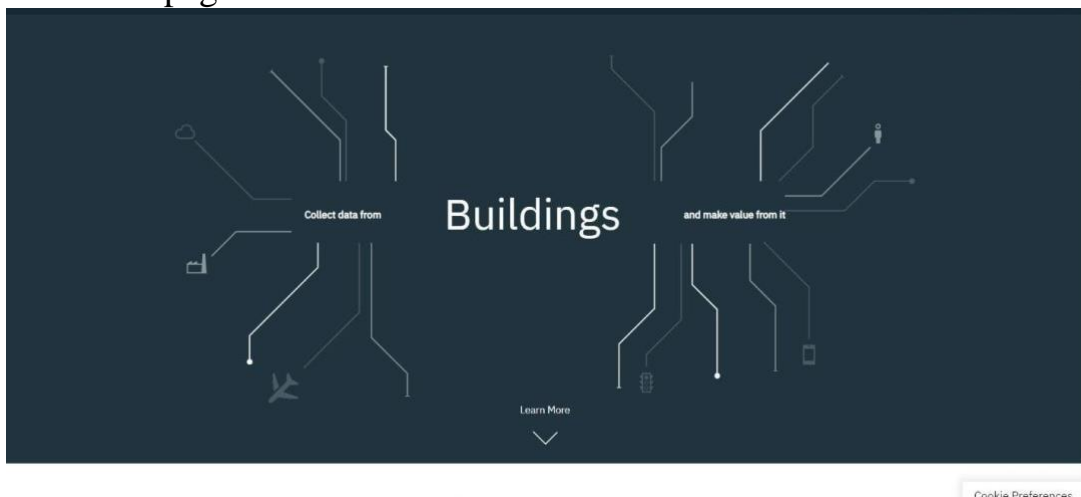

10. Click on the launch button in the manage tab, it will open to this

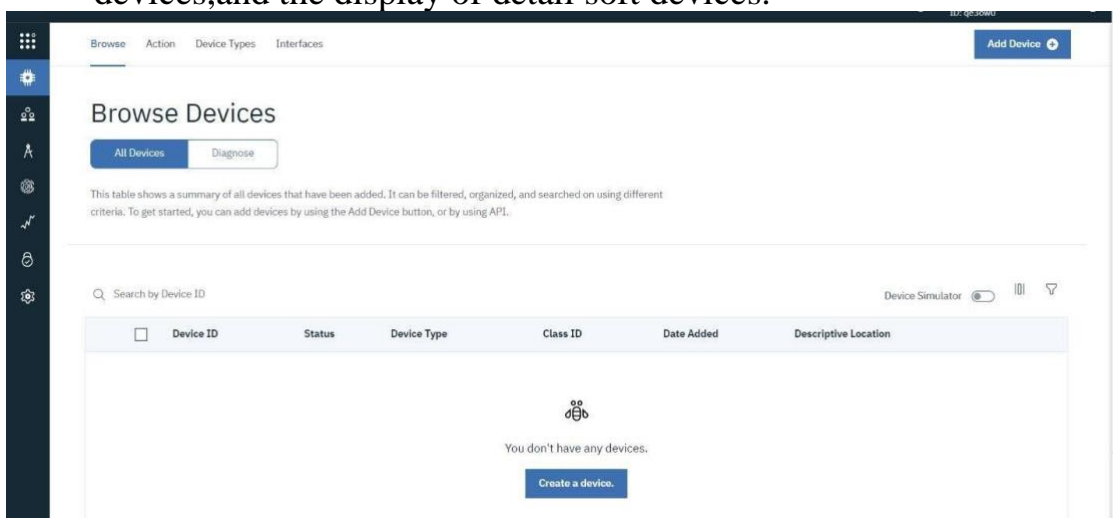

11. Enter the details to sign in to the Watson Cloud to create a device

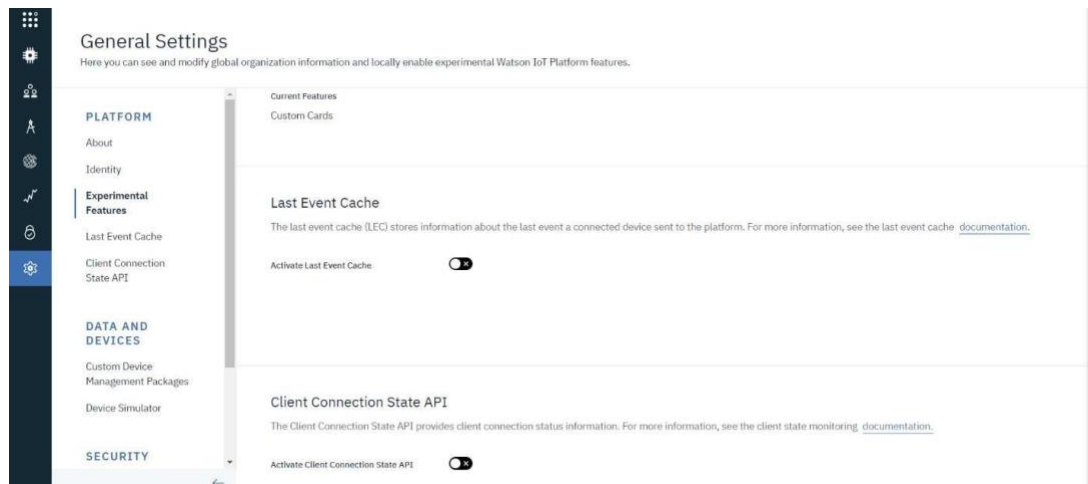

12. Once logged in the name will be displayed and it goes back to the first page

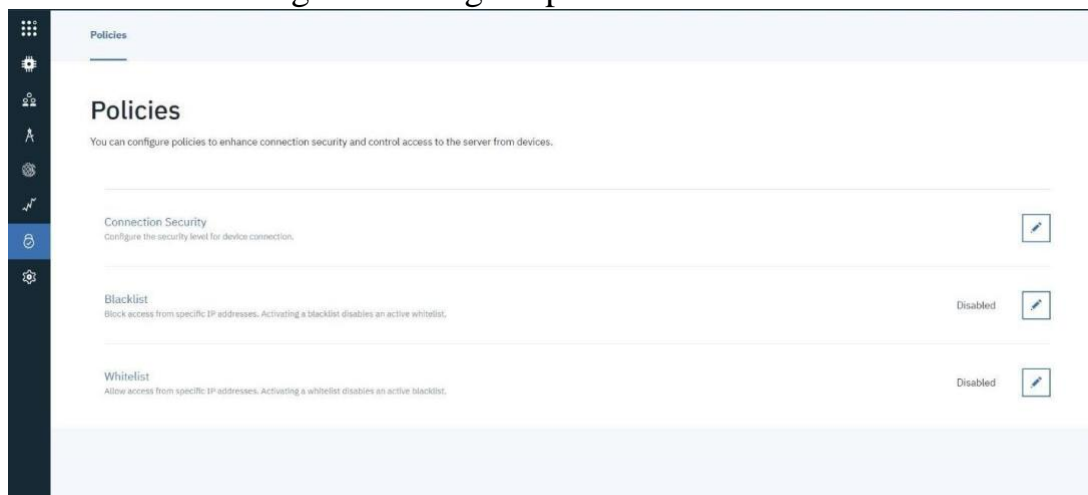

13. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of detail soft devices.

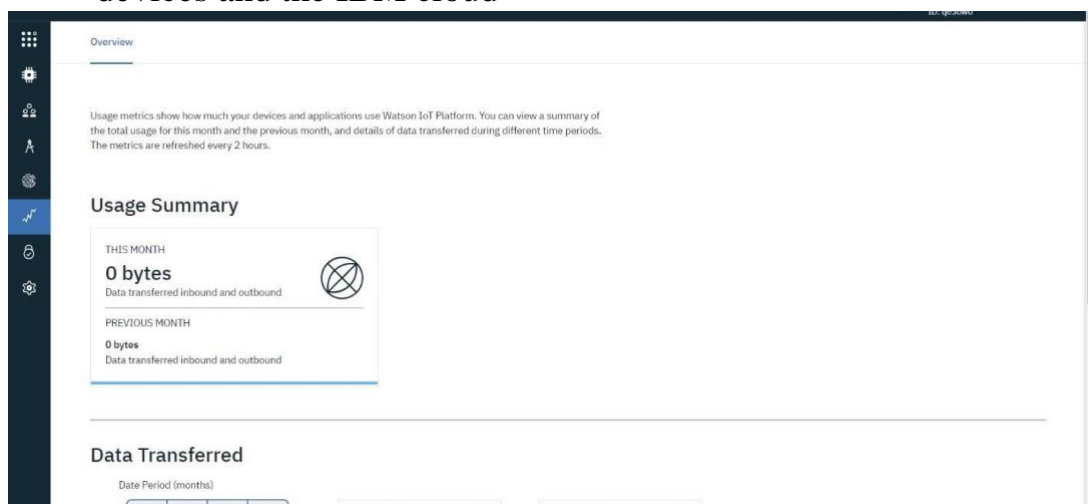

14. The setting tab is used to change the general setting if needed for the project.

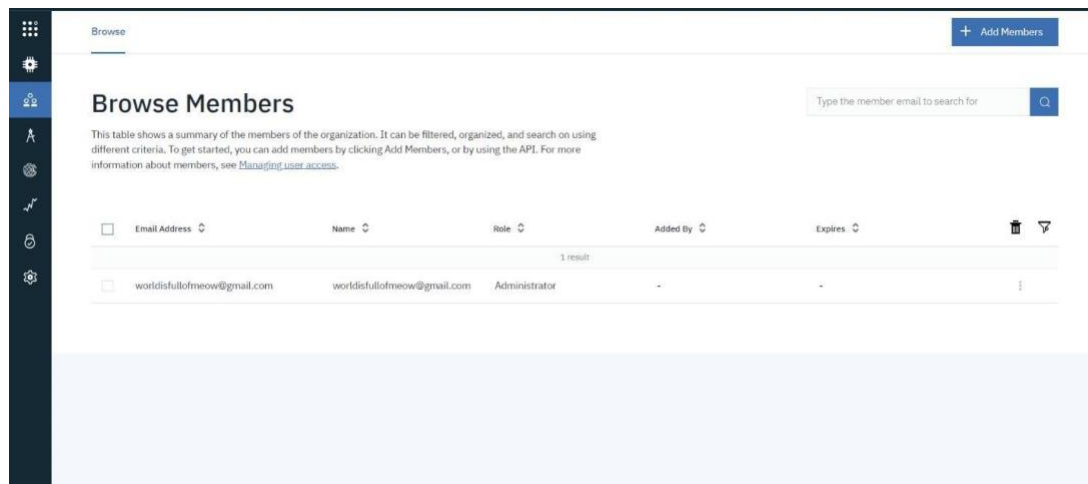

15. In the security tab we can choose the type of security connection and can change according to specification

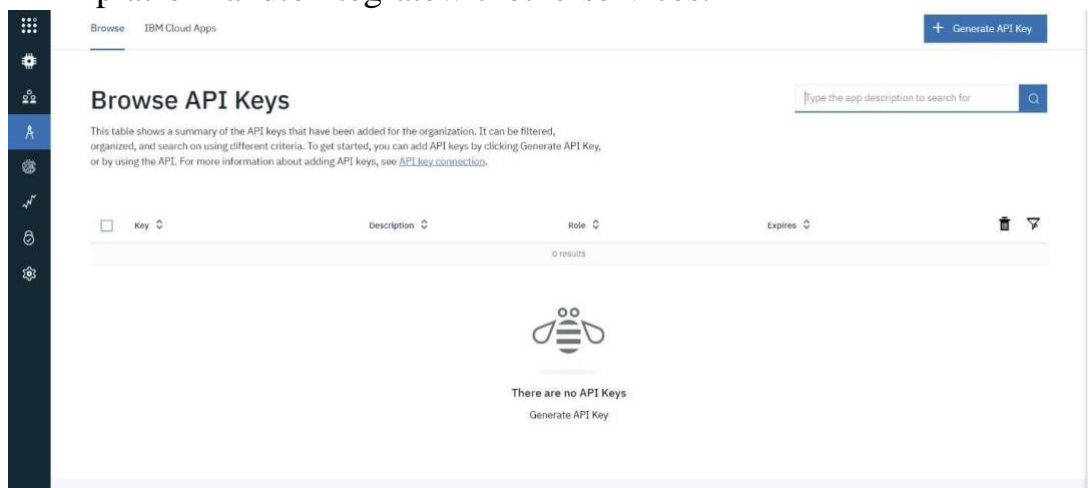

16. Usage gives the summary of how many bytes are used between the devices and the IBM cloud

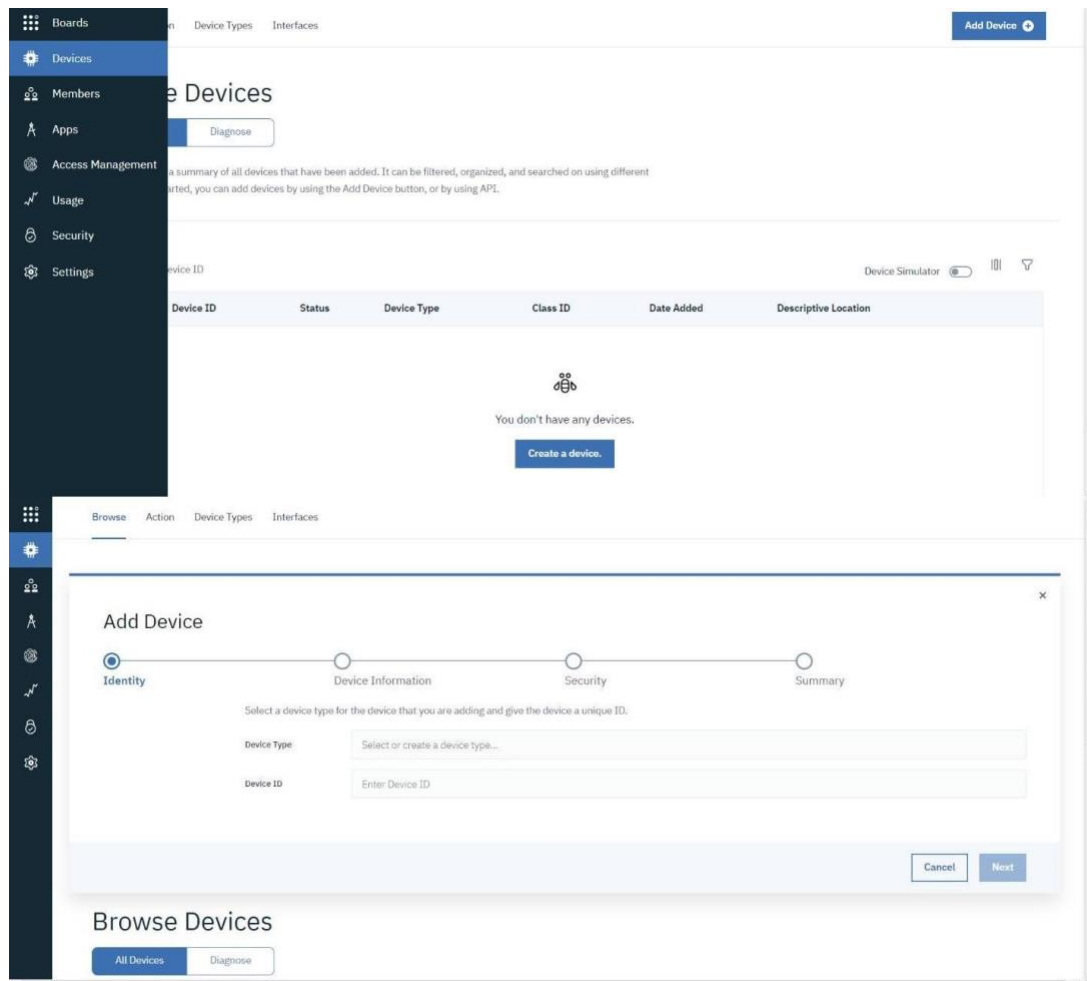

17. The member tab is added to the teams memberstoworkintheplatform

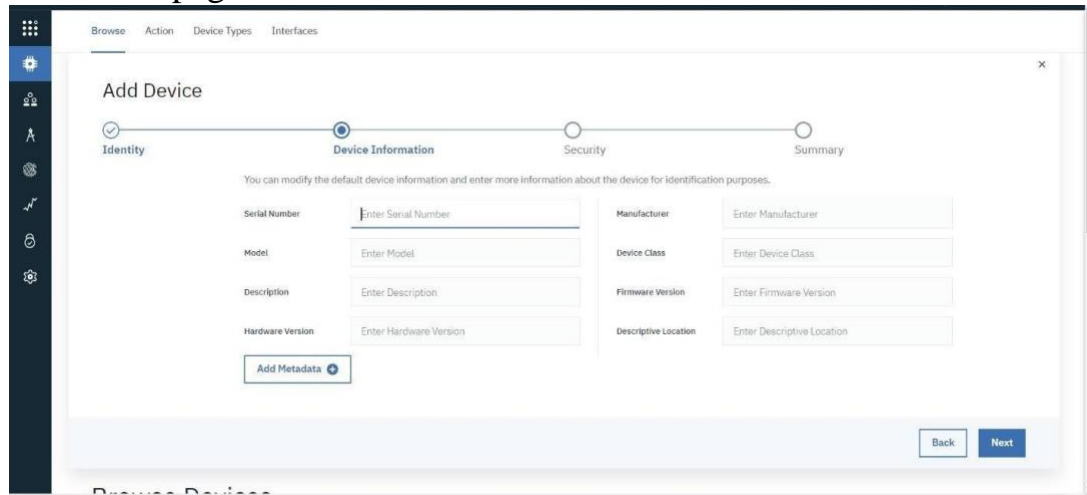

18. This tab is used when you want to connect to some other platform and to integrate with other services.

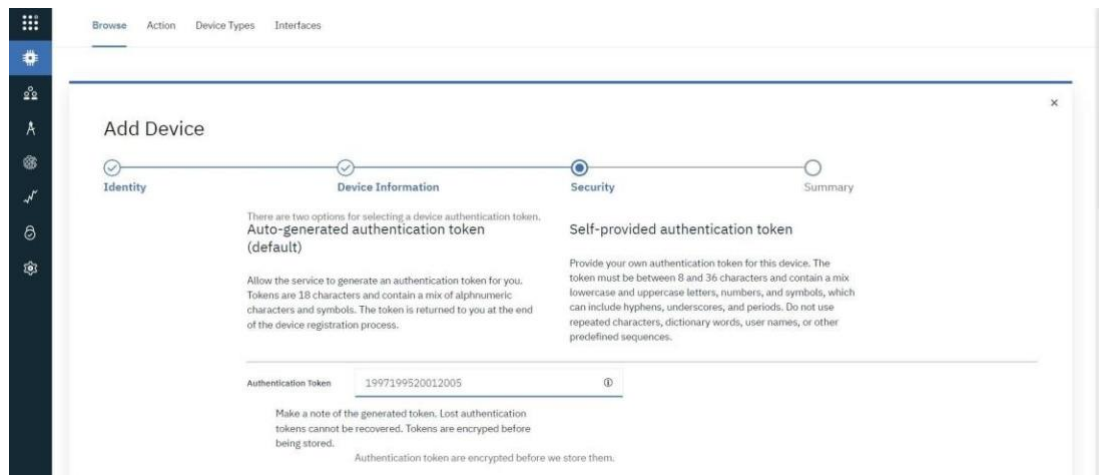

19. Click on the device tab and click on the add device button, then give the device type and device id and click next

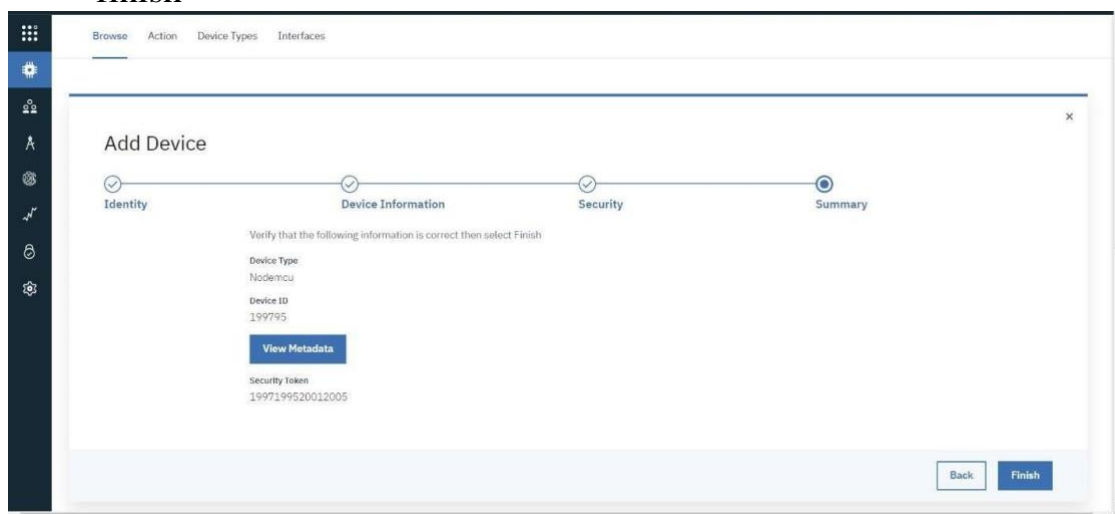

20. This page to enters extra detail sand of the hardware

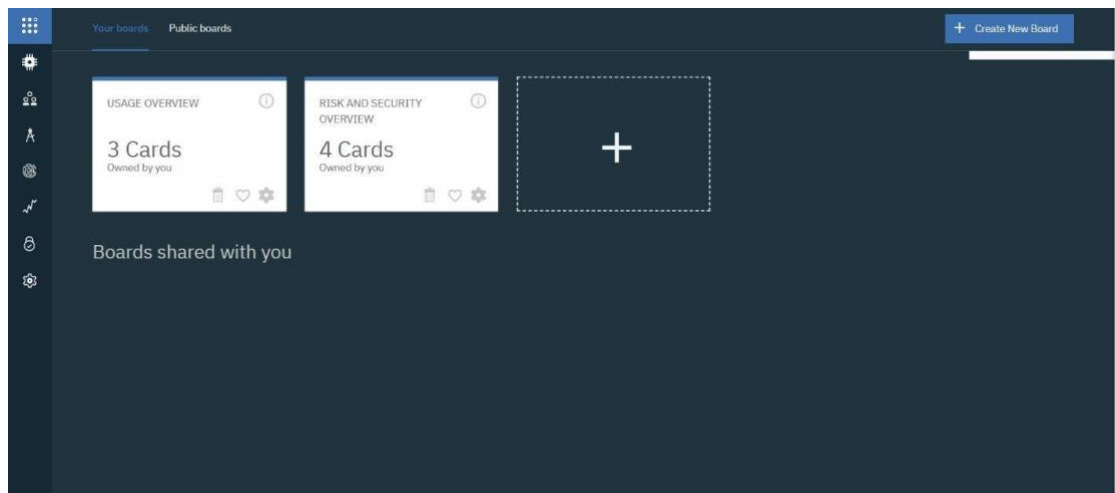

21. Clicking next it goes to the security where we do authentication to kenid.

22. Clicking on next it goes to the summary of the device then click finish

23. The device credentials will be displayed with all the details
24. Save the details of the device as the authentication tokens are nonrecoverable and if misplaced then we have to create a new one.
25. Clicking on the device tab we can now see the added device. Clicking on it will display the other details. It has different tabs like Identity, Device Information, State and login. In a similar way, we can create a number of devices with a 50 per page limit as per the requirement of our project
26. The Boards will display card for the project.

CONCLUSION:

An IBM Watson cloud for IoT and a device is created
