

## DEVELOP A PYTHON SCRIPT

Date	31-10-2022
TeamID	PNT2022TMID45173
ProjectName	IOT based crop protection system
MaximumMarks	4Marks

### SCRIPT:

```
a=int(input())
b=int(input())
c=a+b
print("Thesumis",c)
```

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 a=int(input())
2 b=int(input())
3 c=a+b
4 print("The sum is", c)
```

The script has been executed, and the output is visible in the Run console at the bottom. The console shows the command prompt, the execution of the script, and the resulting output:

```
Run: main x
C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py
4
8
The sum is 12
Process finished with exit code 0
```
